

Angle Brush Pro Finish 1236 Long FSC 100%

Flügger Pro are handmade quality brushes for the professional painter. The brushes have an ergonomic, natural wood handle. High end fibres ensure hiding power and a perfect finish.

Product properties

Anglebrush with durable pro finish fibres and an ergonomic long FSC-certified beechwood handle. All-round brush fibres provide effective application, distribution and a nice finish. Suitable for corners, edges and hard-to-reach items. Long handle provides extra reach. Fully vulcanised brush head and stainless steel ferrule protect against water penetration, prevent discolouration and provide long life.

- All-round brush fibres
- FSC-certified beechwood
- Angle brush

Product use

Painting of mouldings, radiators, pipes, furniture and fixtures. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

Cleaning and Maintenance

Clean brushes using water, alternatively Fluren 59 Brush cleaner, Fluren 37 Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small combustible waste.

Good practice

Remove as much paint as possible from tools before cleaning. Paint and cleaning fluid must not be poured down drains, but collected and disposed of as environmental waste. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid loading the brushes during drying and store the brush dry.

Supplementary Info

FSC is the world's most ambitious global certification for responsible forestry and your safety for wood and paper from well-managed forests and other responsible sources. FSC works for both nature and human conditions in the world's forest areas. Together, we can curb climate change and secure forests full of life for future generations. Through forest certification, FSC helps to ensure good conditions for biodiversity, the aquatic environment, indigenous peoples and forest workers around the world, as well as to spread democracy and education locally. At the same time, the FSC ensures that the forest area is the same generation after generation and prevents deforestation. This means that the FSC contributes to 14 of the UN's 17 world goals and the green transition.

Technical Data

Brush	Synthetic
Shaft	FSC-certified beechwood
Available Sizes	35 mm; 50 mm
Metal type	Stainless steel
