

# Angle Brush Super Finish Short 1834

Flügger Pro are handmade quality brushes for the professional painter. The brushes have an ergonomic, natural wood handle. High end fibres ensure hiding power and a perfect finish.

## Properties

Anglebrush with super finish fibres and an ergonomic short beechwood handle. Flexible brush fibres for thick products, an excellent alternative to natural bristles. Suitable for corners, edges and hard-to-reach items. Fully vulcanised brush head and stainless steel ferrule protect against water penetration, prevent discolouration and provide long life.

- Resilient brush fibres
- Short, sanded, beechwood handle.
- Angle brush

## Use

Painting of mouldings, radiators, pipes, furniture and fixtures. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

## Application

Use it for e.g. radiators and in the places, which are difficult to reach.

## Cleaning and Maintenance

Clean brushes using Fluren 59. Brush cleaner, Fluren 37 Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

## Usefull Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small, combustible waste items.

## Good practise

Remove as much paint as possible from tools before cleaning. Do not pour liquid paint residue or cleaning fluid down drains. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid straining the bristles during drying and store the brush dry.

## Technical Data

Produkttype	Brushes
Brush	Synthetic
Shaft	Beechwood
Available Sizes	25 mm; 35 mm; 50 mm
Metal type	Stainless steel
